Department of Computer Engineering,  
Faculty of Information & Communication Technology,  
BUITEMS, Quetta.

**Session Fall – 2020**

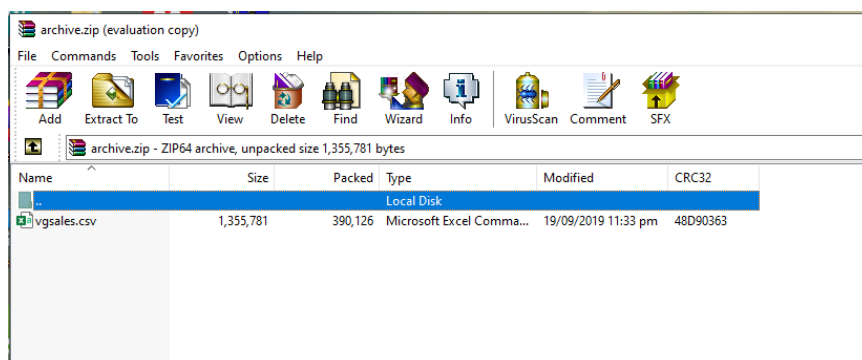

1. First, we must go to Kaggle website then select the dataset we want to use.

The screenshot shows the Kaggle website interface. On the left is a sidebar with navigation links: Create, Home, Competitions, Datasets (highlighted), Models, Code, Discussions, Learn, More, Your Work, and Recently Viewed. The 'Recently Viewed' section lists: Big Five Personality Test, Video Game Sales, Google Stocks Complete, Easiest way to downlo..., and Health Analytics. The main content area displays the 'Video Game Sales' dataset by GREGORYSMITH, updated 7 years ago. It has 5332 votes and a 'New Notebook' button. The dataset description states: 'Analyze sales data from more than 16,500 games.' Below this are tabs for 'Data Card' (selected), 'Code (1399)', and 'Discussion (39)'. The 'About Dataset' section explains that the dataset contains a list of video games with sales greater than 100,000 copies, generated by a scrape of [vgchartz.com](\"http://vgchartz.com\"). It lists the following fields: Rank, Name, Platform, Year, Genre, Publisher, NA\_Sales, EU\_Sales, and JP\_Sales.

2. Downloading the zip file.

3. Extract the zip file.

- First import the panda's library and use the csv command to read the excel dataset file and just run the variable which has the csv file.

```
In [1]: #BY MUSTAFA-KHAN.|
import pandas as pd
df = pd.read_csv('vgsales.csv')
df
#df.shape
```

- The dataset will be shown to you.

Out[1]:

	Rank	Name	Platform	Year	Genre	Publisher	NA_Sales	EU_Sales	JP_Sales	Other_Sales	Global_Sales
0	1	Wii Sports	Wii	2006.0	Sports	Nintendo	41.49	29.02	3.77	8.46	82.74

16598 rows × 11 columns

- Checking the shape of the dataset.

Out[2]: (16598, 11)

- Using the df.describe attribute to check the description of the dataset.

```
In [4]: df.describe()
```

Out[4]:
